Education

University of Pittsburgh, Honors College	August 2019 – April 2023
B.S. Computer Science	GPA: 4.0/4.0

Relevant Coursework: Data Structures & Algorithms, Deep Learning, Operating Systems, Computer Organization & Systems Software, Computer Networking, Web Development, Linear Algebra, Statistics

Skills

- Experienced: Java, Python, Go, JavaScript/TypeScript, Git, Web dev (Node.js, React, Next.js, Redux)
- Familiar: Kubernetes, Linux, C++, C#, Postgres, gRPC, Docker, Deep learning (PyTorch), Cloud (GCP, AWS, Terraform)

Work Experience

Semiotic Labs — November 2022 – Present
Software Engineering Intern — Los Altos, CA (Remote)
- Developing automated testing for the core Odos order-routing algorithm, reducing the reliance on manual testing and providing algorithm stability and accuracy guarantees (**C++**, **Python**, **Smart Contracts**)

Two Sigma — May – August 2022
Software Engineering Intern — New York, NY
- Designed and implemented real-time resource usage tracking for large Kubernetes compute clusters (**Go, K8s, GKE**)
- Successfully identified and fixed bugs in existing compute cluster cost-tracking software, yielding improved accuracy

Semiotic Labs — January – May 2022
Research Intern — Los Altos, CA (Remote)
- Led research with The Graph Protocol to predict GraphQL query costs using deep learning (**Python, PyTorch, K8s, Web3**)
- Built parallelized data generation pipelines and multi-GPU training infrastructure to quickly iterate on datasets and models
- Managed project scope and direction; communicated progress to stakeholders via bi-weekly presentations

Aurora Innovation — September – December 2021
Software Engineering Intern — Pittsburgh, PA (Remote)
- Developed new collaboration features for the web application used to visualize high-definition map data consumed by autonomous vehicles (**Go, TypeScript, gRPC, React, Redux, AWS, K8s**)
- Converted application functionality from a monolithic service into a microservice (**Python, Go, Postgres, AWS, K8s**)
- Optimized the web application database and built supporting CLI tools (**Python**, **Postgres**)

Google — May – August 2021
Software Engineering Intern — New York, NY (Remote)
- Developed a web-based debugging tool for Google's experimentation framework, resulting in increased productivity for over **1000** Google engineers (**Java, TypeScript**)
- Completed the project 5 weeks ahead of schedule, leaving time for additional features, analytics, and product launch

Google — May – August 2020
STEP Intern — Sunnyvale, CA (Remote)
- Worked in a 3-intern team to design, develop, and deploy a mentorship web application for first-time contributors in open source: git.io/JJnot (**Java, JavaScript, React, REST API, OAuth, Google Cloud**)
- Completed a 5-week Google training course on **web development, git, testing,** and **coding best practices**: git.io/JJn6u

Timberlane Inc — March – August 2019
Software Engineering Intern — Montgomeryville, PA
- Developed a web-based product configuration software that streamlined the ordering process (Python, HTML & CSS)

Projects

VaccinatePA — January – July 2021
Co-Founder
- Co-founded a nonprofit website to help people find COVID-19 vaccines in PA: VaccinatePA.org
- Scaled the website from 0 to **450,000 users** in three months with zero budget (**TypeScript, Python, React**, **Next.js**)
- Built a team of **200+ volunteers** to crowdsource vaccine availability data; interviewed with **20+** news stations
